

TITLE: 3rd term enrollment and payment through GUI or Terminal

Ask the user to choose from terminal or GUI to enroll.

If chosen prompt is terminal, the user will be given one by one information about the student:

NAME:

YEAR LEVEL:

COURSE:

NUMBER OF UNITS:

After inputting the needed data, student will be asked for GWA from previous term; if student is a dean's lister, the payment will be void. Else the student will be paying for the tuition Number of units multiplied by the amount per units.

Paying the enrollment fees will be prompt and ask the user to pay the amount on the screen and after will be given a congratulation for enrolling.

If the chosen prompt is GUI, a window will pop up in a sequence where the first sequence will be the information of the student.

NAME:

YEAR LEVEL:

COURSE:

NUMBER OF UNITS:

Then the next sequence will be a list of subject and grades to see if student is eligible for deans list

If the user is eligible for deans list the payment system will be voided and student will be congratulated for being a deans list and congratulate to be enrolled

Else if the student is not eligible for deans list, user will be re-direct to the payment sequence where will see a makeshift cor and ask the student if will be paid now or later, if the customer pressed pay later, the program will end, if pressed pay now, student will be redirect to input amount and pay, then will be congratulated for enrolling.
